ATB Goals: FY01

- Transition to ATB organization
- Establish ATB-100s in Regions
- Develop Integrated Terminal Work Plan for FY02
- Complete milestones for STARS
 - Complete EDC-2 IOT&E and achieve ISD
 - Achieve EDC-2 ORD
 - Complete FS-1 SAT and initiate OT&E
 - Complete FS-2 TRR
- Implement PBO milestones

- Implement ATS standard tool set
 - Project management
 - Configuration management
 - Knowledge management
 - Workflow automation
 - EIS/analysis/reporting
 - Financial management
 - Issue management
 - Communication
 - Service provisioning
 - Service assurance
 - Customer relations

Early Achievements

- Integrated planning and prioritization
 - Moving from a project perspective to a service delivery perspective
 - •Now have detailed information on every facility
 - •Reconciles schedule, priority, and resource loading for each project on a site-by-site basis
 - •Aligns expenditure of funds to a reduction in the risk to service
 - •Allows easy identification of individual site consequences when a change is considered
 - •Example: ATB bell-ringing responses to a \$37M reduction and a \$20M reduction in FY02
- Using the integrated plan to balance local concerns against national priorities
 - Example: ATB response to request to move St. Louis ahead in the STARS waterfall
- Coordinating to minimize adverse impacts
 - Digitizer at Willow Grove
 - PRM/STARS interface

Early Achievements

- Modernization schedule and sequence must be synchronized
 - FDIO example
 - Radar team example
- A change in scheduling has collateral impacts
 - Changing defined software packages (consolidation of Richmond into Potomac)
- Coordination processes are critical
 - Stewart coordination
- Executive STIs have been developed to execute the milestones in the terminal integrated work plan.
 - Eight benchmark airports
 - Remaining 23 OEP airports
